

Better communication means better care.

PATIENT COMMUNICATION BOARD BY AmFab®

Conceived by nurses to enhance communication among patients, their families and their care givers, Patient Communication Board by AmFab provides one easy-to-find, easy-to-use patient information center.

Today's leading healthcare facilities recognize the benefits of patient-centered care. Patient Communication Board by AmFab was designed with an upscale residential aesthetic to provide a home-like environment which research shows supports a faster recovery and can help to reduce the number of pharmaceuticals requested. That combined with the benefits of a centralized communication focal-point, will positively impact patient comfort, care, safety and overall satisfaction.

The financial benefits of using this product, which fosters patient-centered care, include: reduced length of stay, lower cost per case, decreased adverse events, higher employee retention, reduced operating costs, decreased malpractice claims and increased market share.

In the ever-changing healthcare market, consumers are demanding value-added service. Patient Communication Board by AmFab helps improve communication among patients, caregivers and their families while it increases patient satisfaction, improves outcomes and assists with increased compliance of JCAHO standards.

Finish & Module Options:

Patient Communication Board by AmFab is available in a rich woodgrain (cherry, maple or walnut) or a powder-coat painted finish (arctic silver, medium tone, and warm brown). The modularity of this product allows for customization to fit any facility. A single board is designed to accept any combination of up to three modules and the double board is designed for six. To the right are examples of the modules that are currently available. Your board can feature a clock, markerboard, patient information board complete with text and graphics specific to your facility, mirror, mail module, file module (with or without lid), med module, or discharge planner.

This product is made of earth-friendly materials, including recyclable aluminum extrusions that are powder-coated according to environmentally responsible processes. The message board backing is formaldehyde-free.

“Communication with patients and their families is key to safe and patient-centered hospital visit, and the patient Communication Boards [by AmFab] make it convenient for staff to do this well, while enhancing the aesthetics of the patient room.”

Susan B. Frampton, Ph.D., President, Planetree Patient-Centered Care
